

Top 5 Benefits of IMC's Corner Floor Trough

What is FTC-30?

FTC-30 is a new, unique corner floor trough solution designed to alleviate water buildup in corners of your facility.

It is useful in hard to reach corners where equipment might be in the way & drainage is a problem.

IMC's exclusive perforated grating is the heart of FTC-30. Custom sizes & designs are available.

Here's How FTC-30 Will Help You:

- 01 SPACE SAVER** - Sensible solution for where floor space is limited
- 02 PRACTICALITY** - Make the most out of that dead corner space
- 03 PROMOTE SAFETY** - Safely drains liquids, leading to less slipping hazards
- 04 SANITARY** - Easier to clean & sterilize because of nonporous surface
- 05 DURABILITY** - Stainless steel construction performs better than aluminum & plastic counterparts
